The Autism Prophecies

2010-04-20

it is estimated that every 20 minutes a child is diagnosed with autism no one knows why cases of autism are increasing worldwide in the autism prophecies award winning author william stillman who is someone on the autism spectrum himself completes his spiritual trilogy by revealing the truth about autism and its purpose in this intriguing book you will learn how impossible gifts such as mind control and speaking unknown languages could be occurring in some people with autism how parents can distinguish their child s spiritual interactions from behavior that might be mislabeled as hallucinatory and unduly medicated how the wisdom of many people with autism may help us to prepare for future hardships and an impending renaissance of civility respect and compassion

Bad Animals

2012-05-01

joel yanofsky tried for years to start this memoir it s not just going to be about autism he told his wife cynthia it s going to be about parenthood and marriage about hope and despair and storytelling too marriage cynthia said what about marriage a veteran book reviewer yanofsky has spent a lifetime immersed in literature not to mention old movies and old jokes which he calls shtick this account of a year in the life of a family describes a father s struggle to enter his son s world the world of autism using the materials he knows best self help books feel good memoirs literary classics from the bible to dr seuss old movies and yes shtick funny wrenching and unfailingly candid bad animals is both an exploration of a baffling condition and a quirky love story told by a gifted writer

Opening The Doors of Perception

2016-09-13

an eye opening response to aldous huxley s widely influential work on psychedelics physical reality and consciousness what exactly are hallucinations are they actually doors to another reality anthony peake thinks so in this stunning book he takes aldous huxley s the doors of perception and updates it using the latest information from quantum mechanics neurochemistry and consciousness studies most human beings perceive the doors of perception as being securely closed but here peake analyzes the concept of the scale of transcendence and suggests there is a scale of perceptions whereby the doors are slowly opened bit by bit to reveal the true nature of reality for normal people glimpses of this reality what the gnostics called the pleroma are experienced during noetic experiences however for others the doors are prized open by certain neurological processes starting with migraine and progressing through various altered states such as temporal lobe epilepsy bipolar syndrome autism and schizophrenia a pioneering work on the relationship between physical reality and consciousness opening the doors of perception suggests that man can indeed perceive reality in its true glory

asdf mpe represents a roadmap in addressing the multiple issues facing autism psychopaths pedophiles and covid autism can be a scary word and any misdiagnosis can be catastrophic to your child s cognitive or learning ability what is autism when your child can t read or has behavioral issues climbing the autistic ladder from sensory to creative and finally cognitive depends on your child s particular birth defect yes a birth defect could be hormonal biochemical sensory attitude or cognitive autism may not reveal itself until the second grade where learning becomes a monumental stumbling block how you approach your child s education often requires specialized medical or psychological care psychological care attempts to understand how your child s brain works because autism is a broad spectrum of sensory creative and cognitive roadblocks i ve included several examples charts to fill out case studies my own personal experiences and what strategies work best autism consists of 11 senses where most normal people have 5 these 11 senses often branch off into psychopaths and pedophiles which i explain in great detail recognizing each of these 11 senses offers a better understanding of your child s character behavior interests or personality autism is a birth defect afflicting the endocrine system brain and many sensory receptors within the nervous system being a birth defect parents and school administrators must document and design your child s educational curriculum so to better accommodate a successful learning experience

Emerging Voices in Science and Theology

2022-06-01

this volume engages with the relative absence and underrepresentation of female voices in the field of science and religion which tends to be dominated by male academics who are in the later stages of their careers it makes a valuable contribution to correcting this imbalance by showcasing the work of a talented set of rising female scholars which is not necessarily explicitly feminist in content or approach all the authors featured are at a relatively early stage in their careers with diverse backgrounds and interests engaging with traditional and new questions they promise to contribute much to the future development of the field of science and religion

featuring contributors such as john edward char margolis sandy anastasia rick levine glynis mccants mark van stone mary jo mccabe gahl sasson dr alicia tisdale maggie kerr kala ambrose mirabai devi linda west derek o neill alan oken john holland and austyn wells for the past forty years there have been a growing number of people who believe that nothing less than a cataclysmic change is coming in the evolution of mankind from the dawning of the age of aquarius to cosmic forces read aliens coming to engineer our dna to the doomsday scenarios triggered by the end of the mayan calendar there have been those who are sure that the world as we know it is coming to an end and soon but that cataclysmic end has not de materialized or has it in 2012 new data was discovered in guatemala that gives us concrete evidence of a new paradigm concerning the mayans and their calendar we are now faced with the idea that perhaps we aren t staring at armageddon but stand in the middle of a 33 year transformative process while the mayans might have seen a change for humanity it isn t an ending per se and if there is change why does that change need to imply destruction couldn t it be an opportunity for mankind to assess their place in the universe and engage in a positive rebirth in a new era beyond the mayan prophecy posits that our modern day weakness or confusion can be attributed to a less spiritual way of thinking perhaps our left side brain thinking has held us back from discovering and accepting higher planetary secrets for centuries to move forward with more balanced understanding paul shavelson a multi media story teller and former executive producer of the hit psychic television show crossing over has spent

the last decade exploring the world of psychics and mystics paul has assembled a psychic dream team to decode the past and to predict the future with famed metaphysical experts such as char margolis rick levine maggie kerr alan oken and numerologist glynis mccants paul covers everything from alien communication to instant collective thinking the collective unconscious being cultivated on the internet the dialogue and interviews will be discussed through sidebars by psychic medium author and tv personality john edward who also provides the forward and afterword of this provocative subject with positive energy and a willingness to have us think outside the box and a personal journey by the author that brings an unexpected and moving aspect to the experience beyond the mayan prophecy is an entertaining thought provoking work that will let the reader embrace why the second half of this transition could be remarkable and inspiring at the publisher s request this title is being sold without digital rights management software drm applied

Blake's Prophetic Workshop

1993

while william blake s the four zoas may be fascinating to blake scholars it presents formidable obstacles to even the most ardent romanticist let alone interested critics or the general reader blake s prophetic workshop attempts to clear some of these obstacles by studying the work from a variety of critical perspectives it assumes some familiarity with blake s prophecies but is cast between the introductory and advanced levels of the two previous books published on the poem although the major reading strategy is close textual analysis the poem is marked by various cultural and social contexts that need elucidation chapters alternate between sketching these contexts and traditions and providing detailed readings within these contexts the first chapters give a reception history of the work and set it within the tradition of the eighteenth century long poem namely thomson s seasons pope s an essay on man and young s night thoughts texts that blake critiques as newtonian substitutions of miltonic prophecy chapter three tests these assertions by reading the poem s creation narratives in terms of anglican dissenting apologetics the final chapters sift the cultural contexts that shape blake s use of biblical typology and scrutinize several continental philosophies of history and how they encroach on the four zoas as well as situate the poem in the apocalyptic moment of the 1790s while a pluralist approach is followed author george anthony rosso jr subscribes to a fundamentally historical theory that places the four zoas in the broad and eclectic tradition of english poetic prophecy aware of recent critiques of the prophetic rosso pursues his theory with flexibility and tolerance for other viewpoints an appendix provides a useful commentary on the relations between the text and certain designs drawings and sketches in the manuscript its aim is to show that blake repeats key images in various frames to provide a sense of context and development and that the drawings expose what the narrative represses often in graphic sexual detail rosso presents a blake who is both deadly serious and disarmingly ironic about the relevance of prophecy in the modern world book jacket title summary field provided by blackwell north america inc all rights reserved

The Rise of Autism

2020-12-15

the open access version of this book available at taylorfrancis com books e 9780429285912 has been made available under a creative commons attribution non commercial no derivatives 4 0 license this innovative book addresses the question of why increasing numbers of people are being diagnosed with autism since the 1990s providing an engaging account of competing and widely debated explanations it investigates how these have led to differing interpretations of the same data crucially the author argues that the increased use of autism diagnosis is due to medicalisation across the life course whilst holding open the possibility that the rise may also be partly accounted for by modern day environmental exposures again across the life course a further focus of the book is not on whether autism itself is valid as a diagnostic category but whether and how it is useful as a diagnostic category and how the utility of the diagnosis has contributed to the rise this serves to move beyond the question of whether diagnoses are real or social constructions and instead asks who do diagnoses serve to benefit and at what cost do they come the book will appeal to clinicians and health professionals as well as medical researchers who are interested in a review of the data which demonstrates the rising use of autism as a diagnosis and an analysis of the reasons why this has occurred providing theory through which to interpret the expanding application of the diagnosis and the broadening of autism as a concept it will also be of interest to scholars and students of sociology philosophy psychiatry psychology social work disability studies and childhood studies

The Autism of Gxd

2022-12-02

the autism of gxd an atheological love story is truly a love story the story of ruth dunster's autistic search for an authentic personal and theological gxd in this it resembles augustine's confessions as a theological autobiography it becomes atheological however as dunster reckons with what denys turner terms the darkness of god this awareness leads her through the poetry of medieval mystics to the mythic death of god theology of thomas j j altizer the search for faith is nonetheless very real in this strange territory dunster hears her autistic gxd speaking in art poetry novels and music and this further leads her into the territory of literature theology and the arts where in blanchot's words the answer is the poem's absence indeed dunster calls the book a strange poem or even a hymn weaving an autistic mythology out of a rigorous survey of clinical autism this book abounds in challenge and paradox it offers a fascinating view into how an autistic poet becomes a theologian and what more mainstream theologies might learn from this disabled gxd

Peculiar Discipleship

2023-06-30

this is not a theology of neurodiversity it is a theology from neurodiversity in her ground breaking and daring theological exploration claire williams considers how the experience of god for an autistic person challenges and interrogates our normal theologies about knowing god demonstrating how her autistic perspective offers a distinct and fresh hermeneutical lens williams shows that a liberation theology of neurodiversity can gift the church a new way of understanding worship practice ethics and even the nature of christian hope itself
