Lecture Notes in Computer Science

1973

this book is composed of two texts by r l dobrushin and s kusuoka each representing the content of a course of lectures given by the authors they are pitched at graduate student level and are thus very accessible introductions to their respective subjects for students and non specialists contents r l dobrushin on the way to the mathematical foundations of statistical mechanics s kusuoka diffusion processes on nested fractals

Statistical Mechanics and Fractals

1993

cosmology has become a very active research field in the last decades thanks to the impressing improvement of our observational techniques which have led to landmark discoveries such as the accelerated expansion of the universe and have put physicists in front of new mysteries to unveil such as the quest after the nature of dark matter and dark energy these notes offer an approach to cosmology covering fundamental topics in the field the expansion of the universe the thermal history the evolution of small cosmological perturbations and the anisotropies in the cosmic microwave background radiation some extra topics are presented in the penultimate chapter and some standard results of physics and mathematics are available in the last chapter in order to provide a self contained treatment these

notes offer an in depth account of the above mentioned topics and are aimed to graduate students who want to build an expertise in cosmology

Lecture Notes in English A

1903

this compact textbook is a collection of the author s lecture notes for a two semester graduate level real analysis course while the material covered is standard the author s approach is unique in that it combines elements from both royden s and folland s classic texts to provide a more concise and intuitive presentation illustrations examples and exercises are included that present lebesgue integrals measure theory and topological spaces in an original and more accessible way making difficult concepts easier for students to understand this text can be used as a supplementary resource or for individual study

Lecture Notes Mathematics

1983

in fall 2000 the notre dame logic community hosted greg hjorth rodney g downey zoe chatzidakis and paola d aquino as visiting lecturers each of them presented a month long series of expository lectures at the graduate level the articles in this volume are refinements of these excellent lectures

Lecture Notes in Engineering

1985

this book is a compilation of human physiology lecture notes meant specifically for undergraduate and postgraduate medical students as well as biomedical nursing and other medical related courses the contributors of this book are the universiti sains malaysia physiology lecturers who have strived to present the information as accurately and effectively as possible the contents are arranged according to body systems which comprise cell and tissue respiratory system cardiovascular system gastrointestinal system renal system nervous system endocrine system reproductive system and musculoskeletal system this book is designed with the following features to facilitate quick revision of relevant physiology topics compact concise and readable text simplified tables colourful figures examples of short essay question it is hoped that this book will benefit the readers in one way or another happy reading

Lecture Notes in Physics: An Index and Other Useful Information

1975

lecture notes human physiology provides concise coverage of general physiology for medical students as well as students of biological sciences sport science pharmacology and nursing this fifth edition of the ever popular lecture

notes human physiology has been thoroughly revised and updated by a new international team of authors the simple structure and systems based approach remain with a new clean layout for ease of reading and colour now incorporated to aid understanding lecture notes human physiology provides more focus on pathophysiology for clinical relevance is the perfect introduction for medical and allied health care students now includes physiology of pain and increased coverage of heart and the vascular system includes a completely revised chapter on the nervous system

Lecture Notes in Computer Science

1964

this compilation of papers presented at the 2000 european summer meeting of the association for symbolic logic marks the centennial anniversary of hilbert's famous lecture held in the same hall at la sorbonne where hilbert first presented his famous problems this meeting carries special significance to the mathematics and logic communities the pr

Lecture Notes in Mathematics

2018-07-21

based on more than 20 years of teaching experience of the author lecture notes on physics contains his lecture notes on 4 different courses mathematical physics classical mechanics classical electrodynamics and solid state physics for undergraduate students of physics major written with

perfection this is highly polished 2nd edition of the book the 1st edition was also published by american academic press in january 2016

Lecture Notes in Cosmology

2018-11-21

a compilation of 15 years work this book is a contemporary introduction to the art and science of oral and maxillofacial surgery practice for residents packed with useful and practical information the book is written in a succinct style that is easy to understand and follow even for readers whose first language is not english liberally illustrated with simple color diagrams and clinical pictures lecture notes functions as a teaching manual a basic resource for curriculum development and a useful guide for the preparation of examinations

Lecture Notes in Real Analysis

2005-04-09

this textbook is an introduction and guide to undergraduate surgery it has been a bestseller since its first edition in 2001 the philosophy of this book is to focus on the level of knowledge and the approach that would be expected of the better students reaching the end of their undergraduate training avoiding a book that is too cumbersome we have tried to make this volume readable and enjoyable using various techniques to help the reader remember key facts

the text has been deliberately written in a tutorial like story format as opposed to a set of lists since this makes it easier to understand and remember in addition to general surgery the book contains sections on trauma orthopaedics urology and ent making it the only comprehensive textbook for medical students wishing to learn top tips in surgery subjects that are poorly covered in other main texts such as fluid balance management and minor surgical procedures are dealt with in a tutorial fashion in this book and there is a section on how to problem solve even in the context of areas unknown to the student this book is useful for medical students and also for junior doctors during their day to day working lives as well as those coming up to postgraduate exams each chapter is written by an authoritative author alongside the book editors and they have ensured it remains in the spirit of the bestselling previous editions foreword 31 kb

Lecture notes in physics

1997

the lecture notes series is ideal for medical students junior doctors and other allied health professionals lecture notes haematology concentrates on providing the required core subject knowledge and has been extensively revised and updated to reflect the considerable advances in the understanding of the molecular biology and pathogenesis of haematological disorders while continuing the tradition of successfully integrating the physiological pathological and clinical aspects of haematology each chapter begins with a

list of learning objectives that identifies the key elements that students need to know whilst also taking learning to the next level this new edition includes brief sections on the approaches to investigation and treatment of haematological problems the underlying mechanisms and relationships concerning lymphomas and other neoplastic diseases of the bone marrow and the rapidly changing area of bone marrow transplantation illustrated in full colour throughout with new illustrations and photographs of important normal and abnormal blood cells this eighth edition is a comprehensive guide to haematology and an essential aid for anyone who wants a concise introduction to the subject

The Notre Dame Lectures

this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work was reproduced from the original artifact and remains as true to the original work as possible therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work as a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc scholars believe and we concur that this

work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

Lecture Notes on Medical Physiology (Penerbit USM)

1974

this is an introduction to an investment course that focuses on basic models used in the financial industry for investment and decision making the course begins with an overview of the investment environment in developed markets followed by a more in depth analysis of key investment topics these topics include modern portfolio theory asset pricing models term structure of interest rates stock and bond portfolio management and evaluation of portfolio performance modern finance extensively uses the concept of arbitrage or rather the lack of it in financial markets and the course highlights such uses in different circumstances the course takes a hands on approach with the aid of a software package maple the details of which will be explained during the first lecture consequently most lectures will be divided between a theoretical lecture and a lab a practical implementation of the theoretical material of the lecture the use of the maple software in this course simulates to a certain extent a professional environment it allows visualizations of different concepts minimizes tedious algebraic calculations and the use of calculus while

equipping students with intuitive understanding this is facilitated by the symbolic power of maple and its excellent graphic and animation capabilities institutional material is surveyed very concisely so the reader gets an appreciation of the investment lay of the land it is enhanced by an elearning unit self administrated quizzes as well as a stock market game utilizing stocktrack stocktrack introduces students to trading in the real world by practicing different types of orders as well as introducing conventions common in the investment community

Courant Lecture Notes in Mathematics

2019-06-28

this volume will introduce the reader to basic topics of corporate finance the notes will provide an integrative model that will help students evaluate projects examine financing alternatives and assess a firm with problems and detailed solutions at the end of each chapter this volume will also greatly benefit financial managers and investors corporate finance is a discipline from the firm s perspective and addresses the concerns of the chief financial officer of the firm additionally investors need to understand why firms make certain decisions so that they better recognize what drives firm value these lecture notes assume no previous knowledge of finance and are written in conversational style that makes the topics more accessible and easy to comprehend and absorb

Lecture Notes in Numerical Analysis with Mathematica

2008-12-10

every day more and more kinds of historical data become available opening exciting new avenues of inquiry but also new challenges this updated and expanded book describes and demonstrates the ways these data can be explored to construct cultural heritage knowledge for research and in teaching and learning it helps humanities scholars to grasp big data in order to do their work whether that means

understanding the underlying algorithms at work in search engines or designing and using their own tools to process large amounts of information demonstrating what digital tools have to offer and also what digital does to how we understand the past the authors introduce the many different tools and developing approaches in big data for historical and humanistic scholarship show how to use them what to be wary of and discuss the kinds of questions and new perspectives this new macroscopic perspective opens up originally authored live online with ongoing feedback from the wider digital history community exploring big historical data breaks new ground and sets the direction for the conversation into the future exploring big historical data should be the go to resource for undergraduate and graduate students confronted by a vast corpus of data and researchers encountering these methods for the first time it will also offer a helping hand to the interested individual seeking to make sense of genealogical data or digitized newspapers and even the local historical society who are trying to see the value in digitizing their holdings
