how important is conscience for the christian moral life in this book matthew leveraging surveys twentieth century catholic moral theology to construct an argument against centering ethics on conscience he instead argues that conscience must be formed by the revealed truths of scripture as interpreted and applied in the church leveraging shows how conscience centered ethics came to be both prior to and following the second vatican council and how important voices from both the catholic and protestant communities criticized the primacy of conscience in favor of an approach that considers conscience within the broader framework of the christian moral organism rather than engaging with current hot button issues leveraging presents and deconstructs the work of twenty six noteworthy theologians from the recent past in order to work through core matters he begins by examining the place of conscience in scripture and in the catholic moral manuals of the twentieth century he then explores the rebuttals to conscience centered ethics offered by pre and post conciliar thomists and the emergence of a new even more problematic conscience centered ethics in german thought amid this wide ranging introduction to various strands of catholic moral theology leveraging crafts an incisive intervention of his own against the abuse of conscience that besets the church today as it did in the last century this book explores the christian theological legal constitutional historical and philosophical meanings of conscience for both scholarly and educated general audiences the united nations high commissioner for human rights conscience for the world examines the strategies pursued and results achieved by the un s top human rights officials to end atrocities and promote justice equality and protection worldwide prepared and co published by the national catholic bioethics center in philadelphia this book is a combination of two lengthy essays written by cardinal ratzinger and delivered in talks when he was head of the congregation for the doctrine of the faith both talks deal with the importance of conscience and its exercise in particular circumstances ratzinger s reflections show that contemporary debates over the nature of conscience have deep historical and philosophical roots he says that a person is bound to act in accord with his conscience but he makes it clear that there must be reliable proven sources for the judgment of conscience in moral issues other than the subjective reflections of each individual the always unique and profound insights that the new pope benedict xvi brings to perennial problems reminds the reader of his strong warning before the recent papal conclave of the great dangers today of the dictatorship of relativism this work contains several examinations of conscience from catholic classic books it also contains saint alphonse s instruction on confession from his catechism further notes are contained on modern sins and on conversion one examination of conscience distinguishes between mortal and venial sins in preparing for the sacrament of confession it is easy to get into a rut using the same examination of conscience for every confession these examinations are from various sources and are provided to help us shake up our spiritual life by varying our routine we can more easily identify our sins and bring them to the tribunal of penance where we can present them before the divine physician and his human representative the duly authorized priest in this way our confessor can prescribe the remedies for our sins so that we can heed the advice of jesus go now and sin no more lest some worse thing happen to you john 5 14 since these come from timeless older works they have been updated by this author to include the sins that are so easily committed with modern technology such as radio television movies the computer and the internet we hope all will benefit from the sage advice contained in this book in western thought it has been persistently assumed that in moral and political matters people should rely on the inner voice of conscience rather than on external authorities laws and regulations this volume investigates this concept examining the development of the western politics of conscience from socrates to the present and the formation of the western ethico political subject the work opens with a discussion of the ambiguous role of conscience in politics contesting the claim that it is the best defense against totalitarianism it then look back at canonical authors from the church fathers and luther to rousseau and derrida to show how the experience of conscience constitutes the foundation of western ethics and politics this unique work not only synthesizes philosophical and political insights but also pays attention to political theology to provide a compelling and innovative argument that the experience of conscience has always been at the core of the political western tradition an engaging and accessible text it will appeal to political theorists and philosophers as well as theologians and those interested in the critique of the western civilization medical care and biomedical research are rapidly becoming global ethical questions that once arose only in the narrow context of the physician patient relationship in relatively prosperous societies are now being raised across societies cultures and continents for example what should be the standard of care for clinical trials of medical innovations in poorer countries are researchers obligated to compare new therapies or drugs with the best known ones available or can they use as a benchmark the actual treatments or lack of treatments available to poor people should pharmaceutical companies seeking to lower the costs of new drug trials be allowed to enrol citizens of less developed countries in them even when those individuals cannot afford and will not be eligible for the resulting drugs more generally should the norms of medicine and research be the same across cultures or can they adapt to local social economic or religious conditions global bioethics gathers some of the world s leading bioethicists to explore many of the new questions raised by the globalization of medical care and biomedical research among the topics covered are the impact of globalization on the norms of medical ethics the conduct of international research the ethics of international collaborations challenges to medical professionalism in the international setting and the relation of religion to global douglas langston traces its intellectual history to account for its neglect while arguing for its still vital importance if correctly understood in medieval times langston shows in part i the notions of conscientia and synderesis from which our contemporary concept of conscience derives were closely connected to greek ideas about the virtues and practical reason although in christianized form as modified by luther butler and kant however conscience later came to be regarded as a faculty like will and intellect and when faculty psychology fell into disrepute so did the role of conscience in moral philosophy a view of mature conscience that sees it as relational with cognitive emotional and conative dimensions can survive the criticisms of conscience as faculty in part ii through discussions of freud ryle and other modern thinkers langston proceeds to reconstruct conscience as a viable philosophical concept finally in part iii this better grounded concept is connected with the modern revival of virtue ethics and langston shows how crucial conscience is to a theory of virtue because it is fundamental to the training of any morally good person elliot rose s aim in this book spanning an entire century the anniversary collection offers peer reviewed scholarship in a wide range of subject areas the understanding and use of conscience in roman catholicism has undergone evaluation within the broader efforts of the renewal of moral theology called for by vatican ii a review of the literature reveals that among contemporary catholic moral theologians there are differences in the way conscience is understood and employed these differences are reflected in the distinct perspectives of d an examination of conscience of the understanding empirical proof of the existence of god by richard l scott seeking his own utmost depth of comprehensive understanding the author sets out to prove empirically that god exists the seed of proof is the birth paradox its florescence a faith grounded in his spirituality disposed soul as empirically real as his conscious self as mathematically certain as the probability laws of genetic science as necessary as that the universe requires a creator for its rational possibility as immanently intuitive as the divine allegory he mirrors the birth paradox is the contingency of personal conscious existence on the body is there any scientific or commonsense belief as certain of itself and yet as a practical proposition it is an utterly impossible conjunction personal consciousness is necessary specific to its own experience a subtly profound tautology how is it then that one s necessary being can be dependent on a chance body with a new century there has emerged a new age in moral considerations the arab spring facebook and the occupy movement all point to an awareness of and concern for the moral character of the individual and the collective the phrase it s the right thing to do echoing throughout news media and one s daily exchanges typically indicates a moral positioning presented in this book is the argument that now is the time to call it what it is a matter of conscience and to embrace the transformative power of a new vocabulary for moral and character education in a more expansive approach than typically seen this book examines the nature and function of conscience building upon the foundational work of thomas green 1999 the vocabulary of reflexive judgment reflexive emotions normation and voices of conscience are explored as they apply to moral formation with examples and applications provided specific attention is given to the interrelationship of the collective conscience with democracy educating for conscience and the notion of the sacred are also examined written from an educator s perspective this book offers a framework for moral education to both the secular and religious domains one of the most distinctive figures in twentieth century french philosophy vladimir jankélévitch 1903 1985 is becoming increasingly known to the english speaking world the bad conscience which focuses on remorse is central to his moral philosophy indeed jankélévitch finds the foundation of ethics in our experience of the bad conscience or remorse unlike repentance remorse arises out of the realization that we can never undo what has been done in the past it will remain and be a part of us forever this bad conscience gives rise to scruples in us and in

doing so makes us aware of our freedom and the responsibility that our freedom entails according to jankélévitch most ethical theories and systems shield us from remorse this is unfortunate because in his view the very experience of remorse provides the seeds to overcome it in the end the overcoming of remorse as the result of a gratuitous act is accompanied by true joy in many ways the bad conscience and jankélévitch's forgiveness chicago 2005 represent philosophical bookends for jankélévitch remorse is a condition or state that gives rise to forgiveness and without which forgiveness would make no sense remorse opens up the possibility of forgiveness but it does not necessitate it from a jankélévitchian perspective forgiveness is the gratuitous response of one person to another's remorse la mauvaise conscience was first published in france in 1933 but was subsequently revised and expanded this carefully and sensitively translated english language edition corresponds to the most recent edition but indicates where differences among the editions occur andrew kelley who is also responsible for the english edition of jankélévitch's forgiveness chicago 2005 provides a superb translator's introduction placing the bad conscience into intellectual and historical context if we don't find the soul of europe by the end of the century the game will be up said jacques delors in cultures faiths look to the origins meaning of the council of europe to examine the systems values dreams which europe requires for the next millennium from the historical reminiscences of the early includes ziauddin sardar's analysis of an unfeeling west a plea for a new respect for the environment by diana schumacher dr murray stein explores the origins and mechanisms of conscience he defines inestimable blessing to mankind man can hope for no greater blessing on this earth than true peace of soul the sacrament of penance is a perennial fountain of peace it is a source of untold consolation to human hearts this sacrament gives any and every member of the catholic church who has transgressed the holy laws of god an easy and simple means to obtain full pardon and to be restored to his friendship this is its first and principal effect its second effect is to wipe out the punishment due to sin eternal punishment entirely and temporal punishment in whole or in part according to the penitent's dispositions it closes the gates of hell which open to swallow up in the infernal abyss souls who deliberately turn away from god by mortal sin and sunder the ties binding them to him by preferring their own will to his a good confession opens anew the portals of heaven which is barred to souls as long as they remain in the state of grievous sin it clothes souls with the beautiful nuptial garment of sanctifying grace or renders that garment still more beautiful if the soul already possesses it it restores past merits which are lost by even a single mortal sin it renders the soul capable again of performing meritorious acts which is impossible while it is in the state of mortal sin it confers sacramental graces that is powerful supernatural helps to avoid sin in the future and to persevere in the service of god it gives a claim to the special graces the soul needs in order to lead a god pleasing life finally it checks sinful passions and inclinations to evil to partake in fullest measure of these blessings of the sacrament of penance it is necessary for the penitent to know how to make a good confession the present booklet is an attempt to help souls in this
